

My Tree Activity 1

1) Select a tree:

- ✓ Close to your school or home, so that you can observe it often
- ✓ One of the 7 species of the campaign
- ✓ With at least one branch that is positioned low so that you can observe the buds closely.
- ✓ The tree should not be shaded by a building (ideally the tree-building distance is more than the height of the building)

2) Describe the tree and the site:

- ✓ Take GPS coordinates of the site where the tree grows and write down altitude as well
- ✓ Find out what is the Latin name of the tree species (e.g. *Corylus avellana* for hazel)
- ✓ Name the tree (e.g. Hazel 1)

3) Take pictures of the tree using GrowApp.

- ✓ The use of GrowApp is very easy and intuitive. See the [manual](#) on the GLOBE website.

4) Show your tree to the community

- ✓ Share picture or description of the tree at the [Discussion forum](#) of the Spring Campaign.

To use this activity for distance learning, ask students to find a tree near their home so they can visit it alone or with their parents.

The activity should be completed
by March 14th.
